I. CATALOGUE DESCRIPTION

A. Prerequisite: PTA Principles and Procedures II, PTA Principles and Procedures III, and Physical Agents each with a grade of “C” or better, and successful completion of Clinical Experience II

B. Credit hour award: 3

C. Description: This combination lecture-lab course is the last in a series of four designed to provide students with the opportunity to learn and perform patient care skills. Students will study physical therapy theories and principles with a hands-on introduction to essential patient care skills and data collection techniques including therapeutic exercises and other techniques specific to selected topics and specific patient populations including, but not limited to, health promotion and wellness, industrial rehabilitation, burns, orthotics and prosthetics, aquatic therapy, genetic diseases, women’s health, and special topics in geriatric rehabilitation. The course culminates in a comprehensive practical covering all information from throughout the curriculum to ensure safety and competency in entry-level skills prior to beginning terminal clinical experiences.
