Certified Fiber Optics Technician (CFOT) Level I

The Basic Fiber Optics Networking Course is designed for anyone interested in learning basic fiber optic networking and becoming a Certified Fiber Optics Technician.

Certified Fiber Optic Technician - is the FOA certification for general fiber optics applications. CFOTs have a broad knowledge in fiber optics that can be applied to almost any job - design, installation, operation - for almost any application - outside plant, premises, manufacturing, etc.

FOA CFOT certification is based on an extensive knowledge of fiber optics technology and application as well as demonstrated skills in appropriate tasks. Most CFOTs work in the industry as contractors or installers. Consultants, network designers, estimators and trainers would also be expected to have such credentials. Many CFOTs are involved with the manufacture of fiber optic components such as cables, patchcords, active devices and communications systems.

The course includes all materials and the CFOT exam which is a test of the applicant’s level of knowledge of fiber optics in a broad-based exam that covers technology, components, installation and testing and requires verified skills in fiber optics.

The course is a one week course offered five day’s Monday thru Friday. The classes start at 8:00 AM with one hour for lunch ending at 5:00 PM. Each class consists of 10 students which allows more time for hands-on instruction. For detailed course information click Course Syllabus
