LPNs Bridging to RN

Those who currently hold an undisciplined LPN License and want to come into the RN program will need to take the HESI Mobility Test and achieve a minimum score of 850. You are able to take only two (2) exams within an application period, with a two-week waiting period. If you do not obtain the required scores on the first exam, please remediate before taking the second (last) exam of the application period. An application period runs from March to March.

The HESI Mobility exam will be available for students to complete at the Jefferson College Testing centers. For information visit the testing center area of the Jefferson College website. Applicants must score 850 or higher on the exam to obtain an application.

**Note:** Passing scores (850) on the HESI will be required to obtain an application. Applicants will be required to submit copies of all transcripts and test scores to complete their application packet. Meeting minimum requirements does not ensure acceptance into the nursing program.

Additional materials will be needed prior to admittance to the Level II RN nursing program. These materials will include:

- A background check
- Drug and alcohol screening
- Proof of immunizations
- Healthcare Provider CPR certification
